DETAILED ACTION

Allowable Subject Matter

Claims 41-43 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's arguments dated 1/8/07 are determined to be persuasive and the Examiner withdraws her previous rejection. Upon further search it was determined that prior art as a whole fails to teach a gate oxide with a TOTAL thickness of 5A with a nitrogen enriched region found only in the upper half. Therefore claim 41 contains allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's argues the withdrawal of claims 48-52 as being improper. However it is noted that claims 48-52 represent an independent and distinct species. Specifically claim 48 recites a gate oxide region having a thickness of 5A; this is substantially different from the gate oxide layer having a TOTAL thickness of 5A. A intermediate gate oxide region may have a thickness of 5A but a total thickness which is different. Therefore the claim is independent and distinct and requires a separate search from that of the allowed claims above. Consequently, the Examiner's restriction is indeed proper.

Conclusion

This application is in condition for allowance except for the following formal matters:

Claims 48-52 must be canceled.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
